## BURGACLIP® FOUNDATION FITTING KIT Part No. BF-1FK

This is the foundation of the fitting kit range. Including the most popular o-ring configurations in straight, 45° and 90°, in common sizes 6, 8 and 10. Plus some inline splicers, and 90° fittings with access ports. This kit includes all the clips and cages to pair with the fittings, plus Nylog assembly sealant and BURGACLIP® calibrated crimping pliers.

BF-B15	15	Alloy Brazing Rod
RT201B	1	Nylog Blue Assembly Sealant (30ml)

## RE-ORDERING FITTINGS

***"If it's got a tail, add a -K"***

For stock replenishment, if the fitting has a tail, then we can supply it in "kit" form which includes the matching cage and clips.

When ordering, choose the part number and add "-K" to ensure you get the fitting, plus the cage, and the two clips.

**For example:**

To order 54743-08-08A in kit form, add "-K" to the part number, like this: **54743-08-08A-K**

This ensures you receive the fitting, the cage, and two clips.

## BURGACLIP® ALL-IN-ONE KIT Part No. BF-1VK

**BF-1FK, BF-1AK, & BF-1RK  
in one convenient bundle!**

The BF-1VK includes all three original BURGACLIP® fitting kits under one part number. An economical way to maximise your potential, the BF-1VK option will give you serious AC hose manufacturing and repair capabilities. Save time, profit from your expertise, and keep your customers happy.

## BURGACLIP® EMERGENCY KIT Part No. BF-1EK

The emergency kit is the Friday afternoon kit, the call-out at night kit, the trying to fix a family member's car kit. It is the kit you will only use occasionally, but it will save the day and reward you handsomely when you do. We've included a range of step-up and step-down alloy braze-on tails (including clips and cages) - just what you need for those really odd size pipe diameters. There is a selection of Male Insert O-Ring (MIOR) braze-on alloy threaded fittings, in sizes 6, 8 and 10 - in both standard and captive o-ring. This allows you to replace the torn thread on an evaporator or condenser, or simply braze into a damaged alloy line to attach a conventional hose fitting. Plus, you have alloy braze-in R134a Low and High side access charge ports, 1/4" R12 / Male Pressure Switch ports, and a selection of access port dust caps, valve cores, a double ended valve core tool - and, we've included the correct drill bit for installing the access charge ports to any alloy line or pipe. The BF-1EK BURGACLIP® Emergency Kit will provide a serious return on your investment, allowing you to turn the Friday arvo nightmare into a professional and profitable repair.

Item Part Number	Kit Qty	Description
54743-06-08A	4	Step Up Alloy Braze Tail (#06 pipe - #08 tail)
54743-08-10A	4	Step Up Alloy Braze Tail (#08 pipe - #10 tail)
