

VIPER HEAVY DUTY

Universal coil cleaner

COMPETITIVE POINTS OF DIFFERENCE

Viper Heavy Duty is a concentrated version of Viper Coil Cleaner, providing superior cleaning performance on organic contaminants such as natural fats and grime compared with acid or alkaline cleaners. Viper Heavy Duty is safe for technicians, equipment and the environment, including food processing areas as it achieves high quality results without hazardous ingredients. It is non-toxic, non-irritating, odourless, pH neutral, biodegradable and emits no hazardous odours or fumes so no masks or ventilators are needed. Viper Heavy Duty is food industry compliant, with NSF certification for use in and around all food processing areas. It is safe to use anywhere, even in hospitals and restaurants.

APPLICATION

Apply Viper Heavy Duty through the Viper Foam Gun, which allows for better coverage and contact time, or manually dilute the product and use with any conventional spray equipment. Condenser coils require only a light water rinse. Evaporator coils do not need to be rinsed provided there is adequate condensate production.

DIRECTIONS

- 1 Spray cleaner and saturate coil with fluid
- 2 Wait 5-10 minutes to allow cleaner to liquify and loosen dirt, grease, and grime
- 3a Condenser coils: Rinse if water is available (no rinse at 20:1 or higher dilution)
- 3b Evaporator coils: No rinse required

FRIDGEY FACTS

- Compared with an alkaline product such as Viper Brite, Viper Heavy Duty will not lift oxidation and hard carbon deposits.
- The chemical compound in Viper Heavy Duty effectively destroys heavy organic contaminants such as mould, dirt and natural fats.
- Viper Heavy Duty is safe to use on all surfaces, plastics and rubbers.
- Viper Heavy Duty diluted to 50:1 is a brilliant spray-and-wipe

Part number: RT390G

Certified

NSF, EPA and Kosher
Certified, biodegradable
and eco-friendly

Food Safe

Approved for use
in and around food
processing areas

No odours

Viper does not contain
any added fragrances or
produce toxic fumes

Large Equipment

Super concentrated for
large and multi-unit
equipment

Micro-Channel

OEM approved for
aluminium and micro-
channel coils
