

SAFETY DATA SHEET

Viper Ice Machine Cleaner Nickel Safe

Infosafe No.: 5GEVS
ISSUED Date : 28/02/2022
ISSUED by: Australian Chemical Services

1. Identification

GHS Product Identifier

Viper Ice Machine Cleaner Nickel Safe

Product Code

RT500N or G

Company name

SuperCool Asia Pacific Pty Ltd (ABN 71 011 044 385)

Address

14 Motorway Circuit Ormeau

QLD AUSTRALIA

Telephone/Fax Number

Tel: (07) 5549-4000

Fax: (07) 5549-4044

Emergency phone number

1800 628 133 (24/7)

Recommended use of the chemical and restrictions on use

Acid cleaner

2. Hazard Identification

GHS classification of the substance/mixture

Classified as Hazardous according to the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) including Work, Health and Safety Regulations, Australia.

Classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition)

Corrosive to Metals: Category 1

Eye Damage/Irritation: Category 1

Skin Corrosion/Irritation: Category 1B

Signal Word (s)

DANGER

Hazard Statement (s)

May be corrosive to metals.

Causes severe skin burns and eye damage.

Causes serious eye damage.

Pictogram (s)

Corrosion

**Precautionary statement – Prevention**

Keep only in original container.

Do not breathe dust/fume/gas/mist/vapours/spray.

Wash contaminated skin thoroughly after handling.

Wear protective gloves/protective clothing/eye protection/face protection.

Precautionary statement – Response

IF SWALLOWED: rinse mouth. Do NOT induce vomiting.

IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

Wash contaminated clothing before reuse.

IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Immediately call a POISON CENTER or doctor/physician.

Absorb spillage to prevent material damage.

Precautionary statement – Storage

Store locked up.

Store in corrosive resistant/approved container with a resistant inner liner.

Precautionary statement – Disposal

Dispose of contents/container to an approved waste facility..

3. Composition/information on ingredients

Ingredients

Name	CAS	Proportion
Methanesulphonic acid	75- 75- 2	> 10%
Other ingredients determined not to be hazardous		-

4. First-aid measures

First Aid Measures

If poisoning occurs contact a doctor or Poisons Information Centre Phone Australia 131126, New Zealand 0800 764 766.

Inhalation

Remove victim from exposure - avoid becoming a casualty. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume most comfortable position and keep warm. Keep at rest until fully recovered. Seek medical advice if effects persist.

Ingestion

Immediately rinse mouth with water. If swallowed, do NOT induce vomiting. Give a glass of water to drink. Never give anything by the mouth to an unconscious patient. If vomiting occurs give further water. Seek medical advice.

Skin

For gross contamination, immediately drench with water and remove clothing. Continue to flush skin and hair with plenty of water (and soap if material is insoluble). For skin burns, cover with a clean, dry dressing until medical help is available. If blistering occurs, do NOT break blisters. If swelling, redness, blistering, or irritation occurs seek medical assistance.

Eye contact

Immediately irrigate with copious quantities of water for 15 minutes. Eyelids to be held open. Remove clothing if contaminated and wash skin. Urgently seek medical assistance. Transport to hospital or medical centre.

First Aid Facilities

Use should be made of an on-site approved first aid kit if required in the first instance until medical assistance is forthcoming. Potable water should be available to rinse eyes or skin. Provide eye baths and safety showers.

Advice to Doctor

Treat symptomatically. Show this SDS to the medical practitioner.

5. Fire-fighting measures

Fire Fighting Measures

Fire fighters to wear self-contained breathing apparatus and suitable protective clothing if risk of exposure to vapour or products of combustion.

Suitable Extinguishing Media

Not combustible, however, if material is involved in a fire use water fog (or if unavailable fine water spray), foam, dry agent (carbon dioxide, dry chemical powder).

Hazards from Combustion Products

This product is non combustible, however following evaporation of aqueous component residual material can burn if ignited. On burning may emit toxic fumes.

Special Protective Equipment for fire fighters

Fire fighters to wear full body protective clothing with breathing apparatus. Deluge with water to cool containers. Evacuate area move upwind of fire.

Hazchem Code

2X

6. Accidental release measures

Spills & Disposal

Avoid concentrated spillage from entering drains or watercourse. Remove for disposal in accordance with local waste management. Use suitable containers for disposal.

Clean-up Methods - Small Spillages

Wear protective equipment to prevent skin and eye contamination. Avoid inhalation of vapours. Wipe up with absorbent (clean rag or paper towels). Collect and seal in properly labelled containers or drums for disposal.

Clean-up Methods - Large Spillages

Clear area of all unprotected personnel. Prevent further leakage or spillage if safe to do so. Slippery when spilt. Avoid accidents, clean up immediately. Wear protective equipment to prevent skin and eye contamination and the inhalation of vapours. Work up wind or increase ventilation. Contain - prevent run off into drains and waterways. Use absorbent (soil, sand or other inert material). Collect and seal in properly labelled containers or drums for disposal. If contamination of sewers or waterways has occurred advise local emergency services.

Environmental Precautions

Review local regulations before release to the environment.

7. Handling and storage

Precautions for Safe Handling

Avoid eye contact and repeated or prolonged skin contact.

Conditions for safe storage, including any incompatibilities

Store in a cool, dry, well-ventilated place and out of direct sunlight. Store away from incompatible materials described in Section 10. Keep containers closed when not in use - check regularly for leaks.

This material is classified as a Dangerous Good Class 8 Corrosive as per the criteria of the Australian Dangerous Goods Code and must be stored in accordance with the relevant regulations.

Additional information on precautions for use

Always use clean and dry equipment to dispense the product. Dispensers should be cleaned before and after use. All dispensers should be washed out after use.

8. Exposure controls/personal protection

Occupational exposure limit values

No value assigned for this specific material by Safe Work Australia or Department of Labour New Zealand.

Biological Limit Values

As per the 'National Model Regulations for the Control of Workplace Hazardous Substances (Safe Work Australia)' the ingredients in this material do not have a Biological Limit Allocated.

Appropriate engineering controls

Natural ventilation should be adequate under normal use conditions. Keep containers closed when not in use.

Personal Protective Equipment

OVERALLS, SAFETY SHOES, SAFETY GLASSES, GLOVES.

When handling individual retail packs no personal protection equipment is required. Wear overalls, safety glasses and impervious gloves. Available information suggests that gloves made from nitrile rubber should be suitable for intermittent contact. However, due to variations in glove construction and local conditions, the user should make a final assessment. Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storing or re-using.

Hygiene Measures

Keep away from food, drink and animal feeding stuffs. When using do not eat, drink or smoke. Wash hands prior to eating, drinking or smoking. Avoid eye contact and repeated or prolonged skin contact. Ensure that eyewash stations and safety showers are close to the workstation location.

9. Physical and chemical properties

Properties	Description	Properties	Description
Form	Liquid	Appearance	Blue liquid with bland odour
Boiling Point	Approximately 122°C	Solubility in Water	Soluble in water
Specific Gravity	1.21 @ 20°C	pH	<1
Viscosity	Not available	Flash Point	Not applicable
Flammability	Non flammable		

10. Stability and reactivity

Reactivity

No known hazardous reactions.

Chemical Stability

This material is thermally stable under normal conditions of storage and use.

Conditions to Avoid

Elevated temperatures and sources of ignition.

Incompatible materials

Oxidising agents

Hazardous Decomposition Products

Oxides of carbon and nitrogen, smoke and other toxic fumes.

Possibility of hazardous reactions

No known hazardous reactions.

11. Toxicological Information

Toxicology Information

No adverse health effects expected if the product is handled in accordance with this Safety Data Sheet and the product label. Symptoms or effects that may arise if the product is mishandled and overexposure occurs are shown below.

Acute Toxicity - Oral

Acute toxicity estimate (based on ingredients): >2,000 mg/Kg

Acute Toxicity - Inhalation

Acute toxicity estimate (based on ingredients): >20 mg/L

Acute Toxicity - Dermal

Acute toxicity estimate (based on ingredients): >2,000 mg/Kg

Ingestion

Swallowing can result in nausea, vomiting, diarrhoea, abdominal pain and chemical burns to the gastrointestinal tract.

Inhalation

Material may be an irritant to mucous membranes and respiratory tract.

Skin

Contact with skin will result in severe irritation. Corrosive to skin - may cause skin burns.

Eye

A severe eye irritant. Corrosive to eyes: contact can cause corneal burns. Contamination of eyes can result in permanent injury.

Skin corrosion/irritation

Eye: this material has been classified as a Category 1 Hazard (irreversible effects to eyes).

Skin: this material has been classified as a Category 1 Hazard (corrosive to skin)

Mutagenicity

This material has been classified as non-hazardous.

Respiratory sensitisation

This material has been classified as not a respiratory sensitiser.

Skin Sensitisation

This material has been classified as not a skin sensitiser.

Carcinogenicity

This material has been classified as non-hazardous.

Reproductive Toxicity

This material has been classified as non-hazardous.

STOT-single exposure

This material has been classified as non-hazardous.

STOT-repeated exposure

This material has been classified as non-hazardous.

Aspiration Hazard

This material has been classified as non-hazardous.

Chronic Effects

No long-term exposure effects are known.

12. Ecological information

Ecotoxicity

This material has been classified as non-hazardous. Acute & Chronic toxicity estimate (based on ingredients): >100 mg/L.

Persistence and degradability

No data is available on the product itself.

Mobility

No data is available on the product itself.

Bioaccumulative Potential

Risk of bioaccumulation in an aquatic species is low.

13. Disposal considerations

Disposal considerations

Persons conducting disposal, recycling or reclamation activities should ensure that appropriate personal protection equipment is used, see "Section 8. Exposure Controls and Personal Protection" of this SDS.

If possible material and its container should be recycled. If material or container cannot be recycled, dispose in accordance with local, regional, national and international Regulations.

14. Transport information

Transport Information

This material is a Class 8 Corrosive Substance according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. Class 8 - Corrosive Substances are incompatible in a placard load with any of the following:

- Class 1, Explosives,
 - Class 4.3, Dangerous When Wet Substances,
 - Class 5.1, Oxidising Agents & Class 5.2 - Organic Peroxides,
 - Class 6, Toxic Substances (where the Toxic substances are cyanides and the corrosives are acids),
 - Class 7, Radioactive Substances,
 - Class 8, Corrosive Substances (concentrated strong acid is to be segregated from strong alkali),
- and are incompatible with food and food packaging in any quantity.

Globally Harmonised System of classification and labelling of chemicals.

Raw material supplier SDS.

Other Information

SDS version: 3

Reason for revision: Regular Review

DO NOT MIX WITH OTHER CHEMICALS WITHOUT PRIOR CONSULTATION WITH THE MANUFACTURER. Always use product as directed. Never return any unused material to original drum.

Safety Data Sheets are updated frequently. Please ensure that you have a current copy.

This SDS summarises at the date of issue our best knowledge of the health and safety hazard information of the product, and in particular how to safely handle and use the product in the workplace. Since SuperCool Asia Pacific Pty Ltd cannot anticipate or control the conditions under which the product may be used, each user must, prior to usage, review this SDS in the context of how the user intends to handle and use the product in the workplace.

If clarification or further information is needed to ensure that an appropriate assessment can be made, the user should contact this company. Our responsibility for product as sold is subject to our standard terms and conditions, a copy of which is sent to our customers and is also available upon request.
