

Technical Data Sheet

Viper Pan and Drain Treatment

Part # RT800S, 0.946L

Overview:

Viper Pan and Drain Treatment stops chronic drain blockage. This product has been proven to outperform and outlast most tablets or strips. It is a triple action gel that cleans, deodorises and prevents soils from sticking to surfaces. The gel will slowly dissolve with condensate production and will not block drain piping or passages.

Used Where:

Condensate pans and lower sections of evaporator coils.

Directions:

1. Blow out the drain if clogged.
2. Spray the entire pan and drain and bottom rows of the evaporator coil with Viper Pan and Drain Treatment.
3. No waiting required.
4. No rinsing required.

Chemical Description:

Viper Pan and Drain Treatment is a gel containing a proprietary mixture of slow dissolving silicone detergents and digestive enzymes that keep working for up to 90 days. Non-toxic, non-flammable and safe for all metals and plastics. Biodegradable and EPA compliant. Please refer to SDS for more information.

Properties:

The enzymes break-up and disperse the slime, sludge and sediment gumming up the pan, piping, and p-trap. The silicone detergents leave behind a super slippery coating to prevent future build-up and improve condensate flow.

Certifications:

NSF L1 registration number 119844 for use in food facilities. Kosher approved by OK Kosher.

Storage and Handling:

Use standard precautionary measures when handling any chemical. Keep container closed and store away from heat or direct sunlight. Use in well ventilated areas. Rinse any affected areas with soap and water. Soak up spills with absorbent material and dispose according to Federal or State laws. KEEP OUT OF REACH OF CHILDREN.
