

Technical Data Sheet

Hand Rub Sanitiser

Part # RT8990, 5.0L

Overview:

To eliminate the risk of dryness, irritation, cracking and dermatitis that can come with the regular use of alcohol-based hand sanitisers we decided to develop an Australian-made hand rub based on 0.1% benzalkonium chloride with the addition of softening agents. In addition to the potential for skin conditions, hand sanitisers based on a +70% alcohol content are highly flammable, meaning precautions must be taken into account when handling, transporting and storing them.

Used Where:

Viper Hand Rub Sanitiser is used to remove bacteria and sanitise the hands.

Directions:

1. Decant Viper Hand Rub Sanitiser into a suitable clean bottle with a spray, flip top or pump.
2. Hands should be visibly clean before application.
3. Cup one hand and spray, pump or pour a liberal amount into the palm.
4. Place other hand on top and rub product over both palms, the back of hands and between the fingers for at least a minute or until dry.

Chemical Description:

Contains Glycerin, Benzalkonium Chloride, Disodium EDTA, Sodium Citrate.

Properties:

Does not contain alcohol and is non-hazardous according to the GHS classification criteria. The active ingredient remains on the skin surface and does not evaporate. Viper Hand Rub Sanitiser is also pH neutral, odour free and dye free.

Storage and Handling:

Avoid contact with eyes. For external use only. Do not use with other chemicals. If in eyes, hold eyelids apart and flush the eye continuously with running water. If ingested: Contact the Poison Information Centre for advice (Australia 13 11 26 / New Zealand 0800 764 766), If in eyes: Continue flushing until advised to stop by the Poison Information Centre or a doctor, or for at least 15 minutes. If skin irritation occurs discontinue use. KEEP OUT OF REACH OF CHILDREN.

Have you ever checked the chemical ingredients of the products you are using now?
