<b>Pack Quantity:</b>	10	8769-10-BLK-K	Black #10 Cage 10 pack
		8769-12-BLK-K	Black #12 Cage 10 pack

### Background

The Burgaflex premium AC hose solution range has proven to be extremely popular with technicians across the globe. The BURGACLIP® fitting program, incorporating the patented 'clip and cage' system, allows for fast and leak-free AC hose coupling across all common AC hose applications.

Currently, the engineered polymer 'cages' have been available in one colour (Burgaflex blue).

### What's new?

Drawing on our corporate heritage, and recognising the strong demand from craftsmen engaged in the restoration, hot-rod, and classic car industries, BURGACLIP® is now offering black cages, branded as "BURGACLIP® Original".

### How are they different?

The BURGACLIP® Original cages are identical to the blue BURGACLIP® cages in every way except colour.

### Advantages

In certain applications, the aesthetic of a black cage provides a more classic appeal, with a look synonymous with Original Equipment fittings of the past. This provides options for those technicians wanting the highest quality possible with a more refined and subtle under-bonnet appearance.

### Availability

BURGACLIP® Original cages are sold in packs of ten (10). They provide an option for those already invested in the Burgaflex ecosystem to enhance their consumer offering.

(Note: existing fittings and kits continue to be sold with blue cages)
